DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group III including claims 3-4 in the reply filed on April 25, 2005 is acknowledged.

Specification

2. The disclosure is objected to because of the following informalities: the specification does not specifically disclose the detail of how the "memorizing means for memorizing a program invoked on the detecting the absence of said another collar" .

Appropriate correction is required.

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: An electronic device attached to the pet.

Claim Rejections - 35 USC § 112

4. Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, line 2, "detecting the existence of another collar.....", applicant is required to show the first collar and where the detecting means is attached to in order to detect the existence of another collar. Claims 3 appears to have a 112-2nd

antecedent basis problem, claim 3 must have a first collar (collar for information) and other collar (collar for pulling), wherein the detecting means located on the first collar for the detecting the existence of the second collar.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vesey (US 6,668,487) and Ungarsohn (US 5,754,108).
